Author Index

Ahmed, R. 249

Branica, M. 121, 143
Breder, R. 197
Buffle, J. 75

Davison, W. 35
De Mora, S.J. 35
Dongmann, G. 213, 229

Florence, T.M. 67, 263
Frimmel, F.H. 57

Galić, M. 173
Geywitz, J. 57
Goncalves, M.L.S. 105

Harrison, R.M. 35

Mann, K.J. 67
Mantoura, R.F.C. 17
Martinčić, D. 121, 143
May, K. 249

Nguyen, V.D. 213
Nimmo, M. 185
Nürnberg, H.W. 1, 121, 229

Ostapczuk, P. 1

Parthasarathy, N. 75
Patriarche, G.J. 97

Raspor, B. 173
Reutlinger, M. 105
Riley, J.P. 17
Rützel, H. 1

Sigg, L. 105
Sipos, L. 173
Stauber, J.L. 263
Stoeppler, M. 143, 249
Stumm, W. 105

Tercier, M.L. 75
Turner, D.R. 17

Valenta, P. 1, 213, 229
Vandenbalck, J.L. 97
Van den Berg, C.M.G. 185
Van Leeuwen, H.P. 45

Varney, M.S. 17
Vuilleumier, J.J. 75

Whitfield, M. 17
Wilson, S. 35

The Science of the Total Environment, 60 (1987) 274
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Acetate buffers, use in metal speciation analysis by ASV 67
ASV, application to trace metal speciation 67
—, interpretation of peaks for complexation of metal ions with fulvic acid and humic compounds 75
—, trace metal determination in sweat 263
ASV response of Cd, Zn and Pb, dependence on pH and ionic strength 35

Biomonitoring, copper accumulation in bivalves 121
—, zinc accumulation in bivalves 143

Cadmium ASV response, dependence on pH and ionic strength 35
Cadmium, toxicity to bacteria 173
Cathodic stripping voltammetry, see CSV
Chromium(VI), determination using DPASV and DP 97
Complexation reactions of metal ions with fulvic acid, use of ASV 75
Copper accumulation, in bivalves 121
Copper complexation by fulvic acid, comparison of potentiometric and polarographic measurements 17
Coprecipitation of ferric hydroxide with metals in aqueous systems 57
CSV, application to determination of complexing capacity of nickel in seawater 185

Differential pulse anodic stripping voltammetry, see DPASV
Differential pulse polarography, see DPP
DPASV, application to the determination of heavy metals 1
—, application to the determination of surface binding of metals to bacterial surfaces 105
—, determination of Tl(I) and Cr(VI) 97
DPP, application to the determination of surface binding of metals to bacterial surfaces 105
—, application to the measurement of the coprecipitation of metal ions with ferric hydroxide 57

Fulvic acid, complexation with metal ions 75

Heavy metals, concentrations in seawater 197
—, determination by DPASV 1
—, washout rate constants 213
—, wet deposition 229
Humic compounds, complexation with metal ions 75

Lead ASV response, dependence on pH and ionic strength 35
Lead complexation by fulvic acid, comparison of potentiometric and polarographic measurements 17

Mercuric ion, use in metal speciation analysis by ASV 67
Mercury, wet deposition of 249
Metal complexes, effect of kinetics and diffusion coefficients on voltammetric titrations of 45
Methylmercury, wet deposition of 249

Nickel, interaction with dissolved organic material determined by CSV 185
Nitrilotriacetic acid, toxicity to bacteria 173
Non-invasive techniques for biological monitoring 263

Sector dispersion model, application to the determination of washout rate constants of heavy metals 213
—, application to the modelling of wet deposition of heavy metals 229

Thallium(I), determination using DPASV and DP 97
Trace metals, determination in sweat by ASV 263

Wet deposition of mercury and methylmercury 249

Zinc accumulation, in bivalves 143
Zinc ASV response, dependence on pH and ionic strength 35
